REDISCOVERING THE ULUZZIAN

A LEAKEY FOUNDATION PROJECT

29 novembre 2016 ore 11.00- 13.00

Aula Magna A. Campana

Rediscovering the Uluzzian is a project headed by the University of Ferrara and aimed to gather new data for the reconstruction of behavioural dynamics across the Middle Palaeolithic — Upper Palaeolithic transition, through exploration of recently discovered sites as well as the re-opening and excavation of partially investigated sites across Italy. Results achieved from the sites here taken into account, Grotta di Fumane, Riparo del Broion, Grotta di Uluzzo C, Grotta di Castelcivita, Grotta della Cala, will be presented in this workshop by teams from universities of Ferrara, Bologna, Siena and Rome.

Contributions (15-20 min each)

Peresani M., Delpiano D., Romandini M. (UniFe), Lunates, backed pieces and the large use of splintering technique at Riparo del Broion (Colli Berici, Vicenza).

Capecchi G., Moroni A. (UniSi), The 2015-2016 fieldworks at Grotta della Cala and Grotta Castelcivita.

Crezzini J. (UniSi), Taphonomy of macromammal remains from the Uluzzian at Grotta Castelcivita.

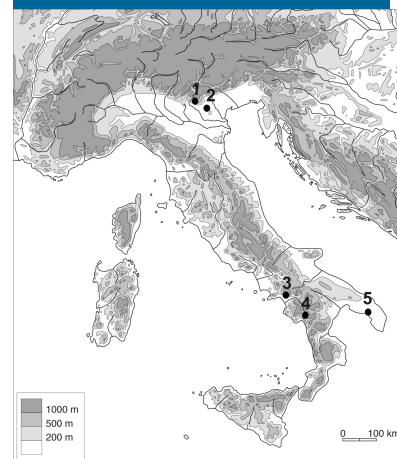

Benazzi S., Spinapolice E. (Unibo and UniRoma), News from the Uluzzo bay: new researches in the Middle to Upper Palaeolithic site of Uluzzo C (Nardò, Lecce).
